

Chubb Secure Next Generation Signaling Systems

Chubb Monitoring will be alerted
in the event of
Line Cuts
Use of GSM Blockers
Communication path faults
Providing 24/7 Secure Managed
Signaling Systems

Communication

Utilising GPRS / GSM / IP ADSL /
PSTN paths to ensure alert
signals are transmitted to Chubb
Monitoring 24/7

Primary communication paths
GPRS / IP ensuring the fastest
transmission speeds available

Intelligent Managed Security Solution

Chubb DualCom monitors each
communication path & reports
any Path failure to ensure your
premises is protected 24/7

Powerful Polling servers ensures
that Chubb Monitoring will be
alerted in the event that
communications paths are
attacked or develop a fault
ensuring that customer
responders are alerted at the
earliest opportunity

Compatible Transmission System

All security systems can be easily
upgraded to incorporate Chubb
DualCom providing secure
intelligent signaling

Chubb DualCom can be used as a
stand alone secure
communication device providing
secure signaling where land lines
are not available

**Protecting 24/7
Staff – Premises - Stock**

Now Available for Installation

Chubb DualCom Secure Signaling System incorporating Multi Communication Paths & Multi Polling Strategies

- Using GPRS / IP as Primary signaling Path - provides fastest transmission speeds available
- SIM Card provided with fixed annual charge will roam across all available networks providing maximum coverage
- Chubb DualCom can be connected to any Intruder Alarm system or fitted as a stand alone system for non security applications

Avail now of the benefits of a high security signaling system incorporating the benefits of a managed networked solution at cost effective prices

Chubb DualCom is available for use where no fixed lines are available

The Chubb Dualcom IP card can be added at any time to provide enhanced signaling dependent on risk

There are a variety of Polling strategies available to suit all risks, Polling strategies can be upgraded at any time as required

Chubb DualCom Next Generation Signaling Systems are ideally suited to provide protection against

- **Line Cutting**
- **GSM Blockers**
